

The GATE Score is calculated using the following formula:

GATE Score =
$$S_a + (S_i - S_a) \frac{(M - M_a)}{(\overline{M}_i - M_a)}$$

where.

- M is the marks obtained by the candidate in the paper, mentioned on this scorecard,
- M, is the qualifying mark for general category candidate in the paper,
- is the mean of marks of top 0.1% or top 10 (whichever is larger) of the candidates who appeared in the paper, (in case of multi-session papers including all sessions)
- = 350 is the Score assigned to M,
- = 900 is the Score assigned to \overline{M}

In the GATE 2015 score formula, M_{ν} is usually 25 marks (out of 100) or $\mu + \sigma$, whichever is greater. Here μ is the mean and σ is the standard deviation of marks of all candidates who appeared in the paper.

Qualifying in GATE 2015 does not guarantee either an admission to a post-graduate program or a scholarships/assistantship. Admitting institutes may conduct further tests and interviews for final selection.
